EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Barry Goldsmith on 11/26/08.

The application has been amended as follows:

In claim 9, line 5, after the word "determining", and before the phrase "whether title", insert the following: "using the computer".

In claim 25, line 6, after the word "determining", and before the phrase "a price", insert the following: "using the computer".

In claim 17, line 1, after the phrase "A computer program product", and before the word "having", insert the phrase "embodied on a computer readable medium,".

Allowable Subject Matter

2. Claims 1-25 are allowed.
3. Since allowable subject matter has been indicated, applicant is encouraged to submit formal drawings in response to this Office Action. The early submission of formal drawings will permit the Office to review the drawings for acceptability and to

resolve any informalities remaining therein before the application is passed to issue.

This will avoid possible delays in the issue process.

3. The following is an examiner's statement of reasons for allowance. None of the prior art of record either individually or in combination teach the following:

-Determining a price of goods to a buyer based on the determination of whether the title to the goods passes directly from the manufacturer to the buyer or through an intermediate e-market place.

The present invention discloses a computer-implemented method for determining a price of goods made by a manufacturer in response to at least one electronic order from a buyer for the goods. The allowable feature of determining a price of goods to a buyer based on the determination of whether the title to the goods passes directly from the manufacturer to the buyer or through an intermediate e-market place is not disclosed by any prior art reference. The closest prior art, Kopelman et al (US 2004/0138966 A1) shows a method and apparatus for facilitating sales of goods by independent parties by an intermediary, referred as a marketeer. Newly cited prior art, Tewari et al, "Design and implementation of an agent-based intermediary infrastructure for electronic markets", discloses Multi-Attribute Resource Intermediary, a project which proposes to improve online marketplaces, specifically those that involve the buying and selling of non-tangible goods and services, where making price is just one of a multitude of possible factors influencing the decision to trade. The next newly cited art, Tang-J-E, et al, "A conceptual model for interactive buyer-supplier relationship in electronic commerce", discloses the interactive behavior of the buyer-supplier relationship, and by

taking the information service provider as an intermediary, the model includes a buyer, supplier and information service provider as three major parties, where cost, and flow of goods are included in the model as buyer-supplier objectives. However, Kopelman et al, Tewari et al, and Tang-J-E, et al all fail to disclose the feature of determining a price of goods to a buyer based on the determination of whether the title to the goods passes directly from the manufacturer to the buyer or through an intermediate e-market place. This distinct feature has been added to independent claims 1, 9, 17 and 25, and renders them and all claims that depend from them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
